1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND COMPANY

   Trade name: M2316
   Chemical identification: SATURATED CARBOXYL-TERMINATED POLYESTER RESIN
   Intended/recommended use: POWDER COATING
   Identification of the company
   Company: Yantai Meicheng Advanced Materials Co., Ltd
   #1202 Huanghai Mingzhu No.63 Guanhai RD,Laishan,Yantai, China
   Telephone: +86-535-6397472
   Fax: +86-535-6903929
   Emergency Phone +86-18953566117

2. COMPOSITION/INFORMATION ON INGREDIENTS

   Substances presenting a health or environmental hazard within the meaning of the Dangerous Substance Directive 67/548/EEC:
   None.

3. HAZARDS IDENTIFICATION

   This product is not hazardous when handled under normal conditions of use.
   By excessive exposure to dust coming from the polyester resin, eye and respiratory tract irritation is possible.

4. FIRST AID MEASURES

   General information: In all cases of doubt, or when symptoms persist, seek medical attention.
   Never give anything by mouth to an unconscious person.
   Take to fresh air and seek medical attention.
   After inhalation: Do NOT use solvents nor thinners, an industrial skin cleanser is preferred.
   If easy to do, remove any contact lenses.
   Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart.
   After ingestion: Stimulate vomiting and seek medical attention.

5. FIRE-FIGHTING MEASURES

   Suitable extinguishing media: foam, CO2 powder, water
   Extinguishing media which must not be used for safety reasons: High pressure water jet
   Special hazards from the substance itself, its combustion products or from its vapors:
   Fire will produce dense black smoke.
   Exposure to decomposition products may cause a health hazard.
   Keep containers cool by spraying with water if exposed to fire.
   Do not allow run-off from fire fighting to enter drains or water courses.
   Aldehydes and acids can be liberated.
   Thermal decomposition can lead to the evolution of irritant vapor or gases and/or fire.
   Special protective equipment for firefighters: Pressure demand self contained breathing apparatus should be provided to fire fighters in building or confined area where this product is stored.

6. ACCIDENT RELEASE MEASURES

   Personal precautions: Protective measures are listed in sections 7 and 8.
   Confine area of spill and transfer spilled product to suitable containers for disposal.
   Environmental precautions: Avoid discharge into the environment.
   If the product gets into drains, inform the relevant authorities immediately.
   Methods for cleaning up/taking up: Sweep up into suitable containers for disposal.

7. HANDLING AND STORAGE

   Handling: Comply with the health and safety at work laws.
   Information regarding personal protective measures see, section 8.
   Always keep in polyethylene bags of same material as the original one.
   Avoid the inhalation of dust and/or particulates arising from the application.
   Isolate from sources of heat, sparks and open flame.
   Do not eat, drink or smoke in application area.
   Local exhaust is recommended.
Storage: Prevent unauthorized access. Polyethylene bags which are opened must be carefully resealed and kept upright to prevent leakage. Protect from direct sunlight and all heat sources in order to avoid sintering.

Specific use guideline(s): See the Safe Powder Coating Guideline (CEPE, 6th edition, 2001)

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure limit values – Exposure control
Remarks to Exposure controls: Local exhaust is recommended. Avoid inhalation of dust.

Personal protection

Respiratory protection: Ensure adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates below the OEL, suitable respiratory protection must be worn. Under conditions of frequent use or heavy exposure, respiratory protection may be needed. In situations where misting or flying may occur, use appropriate certified respirators.

Hand protection: Barrier creams may help to protect the exposed areas of the skin, they should however not be applied once exposure has occurred. Wear suitable gloves.

Eye protection: Protection from dust by safety glasses.

Skin protection: None.

Environmental exposure controls: See the Community Environmental Protection Legislation.

9. PHYSICAL AND CHEMICAL PROPERTIES

General information

Appearance: Pale granules
Odor: odorless
Freezing point / interval: not applicable
Boiling point / interval: not applicable
Flash point: > 200°C (Method: Cleveland Open Cup)

Explosion properties: not applicable
Vapour pressure: not applicable
Density: 1.2 g/cm³
Solubility in water: insoluble
Octanol/water partition coefficient (log Pow): Not available
Fat solubility (solvent-oil): Not available

10. STABILITY AND REACTIVITY

Condition to avoid: Protect from heat and direct sunlight
Materials to avoid: None.
Hazardous decomposition products: None.

11. TOXICOLOGICAL INFORMATION

Toxicological (health) effects and possible symptoms after exposure: When the preparation test-data are not available, the preparation has been assessed following the conventional method of the Dangerous Preparations Directive 1999/45/EC and classified for toxicological hazards accordingly. See sections 2 and 15 for details.

Information on the product: No specific toxicological data available for this product.

12. ECOLOGICAL INFORMATION

When the preparation test-data are not available, the preparation has been assessed following the conventional method of the Dangerous Preparations Directive 1999/45/EC and classified for toxicological hazards accordingly. See sections 2 and 15.
MATERIAL SAFETY DATA SHEET

Product: M2316
Version: 2
Date: 06/06/2016

13. DISPOSAL CONSIDERATION
Product: The product and its packaging may be disposed of under controlled incineration and in agreement with local and national legislation. Do not allow to enter soil, waterways or waste water canal.

14. TRANSPORT INFORMATION
ADR: Not regulated for transport.
RID: Not regulated for transport.
IMDG: Not regulated for transport.
IATA: Not regulated for transport.

15. REGULATORY INFORMATION
EC: All components may be commercialized according EEC/92/32 directive.
National regulations:

16. OTHER INFORMATION
Recommended restrictions on use: For industrial use only.
